

Danish  Maritime

Danish Maritime Technology Conference

a part of Danish Maritime Days

7-8 October 2015
The Train Workshop
Otto Busses Vej 5A, Copenhagen

Programme Wednesday 7 October

Leveraging New Technologies and Innovation

Morning Session - Energy Efficiency

Opening of Danish Maritime Technology Conference

Chairman of Danish Maritime Thomas S. Knudsen and representation from the Danish Government.

Moderator

Lars Robert Pedersen, Deputy Secretary General, BIMCO

Keynote Speaker

Confronting Core Challenges

FORCE Technology: How to Improve Energy Efficiency and Reduce Emissions Based on CFD and Towing Tank Testing

Alfa Laval: Energy Efficiency in Utilizing the NEW Generation of Waste Heat Recovery Systems

Hempel: The Why and How Hull Coating Can Improve Your Bottom Line

MAN Diesel & Turbo: n.a.

In-depth Session - A Dive Into the Core Challenges of the Maritime Industry

Concluding Remarks and Key Points

Lunch

Programme Wednesday 7 October

Leveraging New Technologies and Innovation

Afternoon Session - Energy Efficiency

Keynote Speaker

Confronting Core Challenges

MAN Diesel & Turbo: Taking the Lead in Global Emission Control

Alfa Laval: n.a.

Emerson Process Management Marine Tank Management - Damcos: Operate with Greater Precision – Fuel Efficiency

Inrotech: Intelligent and Mobile Welding Technology for Shipbuilding

In-depth Session - A Dive into the Core Challenges of the Maritime Industry

Concluding Remarks - Key Points

Niels Bjørn Mortensen, Director, Maersk Maritime Technology: The Regulatory Minefield - Compliance and Enforcement

End of Day One

Please note that the programme is tentative

Programme Thursday 8 October

Maritime Growth Areas, Meeting the Infrastructure Needs of the Future,
Workforce of the Future

Morning Session

Keynote Speaker

Moderator: n.a.

Keynote Speaker

Confronting Core Challenges

Hempel: Process Optimisation

VIKING Life-Saving Equipment: Ship Owners Agreements - Servitization Optimized

Wärtsilä Danmark: Creating the LNG Infrastructure

VIKING Life-Saving Equipment: Saatsea - Your Efficient STCW Solution

In-depth Session - A Dive into the Core Challenges of the Maritime Industry

Concluding Remarks and Key Points

Lunch

Please note that the programme is tentative

Programme Thursday 8 October

Maritime Growth Areas, Meeting the Infrastructure Needs of the Future,
Workforce of the Future

Afternoon Session

Keynote Speaker

Confronting Core Challenges

University of Southern Denmark/Søby Yard: The World's Largest Battery Driven Ferry / Green Ferry Vision

Inrotech: Robotisation in a Smart and Competitive Way

VIKING Life-Saving Equipment: Nadiro - a New Level of Lifeboat Safety

In-depth Session - A Dive Into the Core Challenges of The Maritime Industry

Concluding Remarks and Key Points

Closing of the Conference

Join us in open discussions and sessions on topics such as servitization, energy, safety and green technologies.

The conference is held with support from The Danish Maritime Fund

Danish Maritime Technology Conference - a part of Danish Maritime Days 2015

In week 41, the global maritime industry is gathered in Copenhagen for Danish Maritime Days 2015.

Danish Maritime Days is a global platform for collaboration across the industry.

Danish Maritime Forum is a high-level, by invitation only, summit that brings together leaders from the global maritime industry with policy makers, experts and influential decision-makers to discuss strategic challenges and innovative solutions in a new thinking context.

Danish Maritime Forum is held on 7-8 October 2015.

Read more about Danish Maritime Days and see the full event programme at www.danishmaritimedays.com

Danish Maritime Fair

Danish Maritime Fair connects the Nordic maritime cluster with the global industry players and provides a space in the limelight for the Danish maritime industry in the rustic and intimate sphere of the Train Workshop where maritime stakeholders can meet and network, discuss ideas and find ways to new collaborations. Danish Maritime Technology Conference is held at The Train Workshop (Lokomotivværkstedet) the very same location as Danish Maritime Fair 2015.

Visit Danish Maritime Fair on 6-8 October 2015

Danish Maritime Fair

Blue INNOship Event Tuesday 6 October

Market Driven Maritime Innovation

The maritime industry is facing many different challenges which require involvement of cross-disciplinary competences. To increase the development speed of market driven solutions to the challenges of the industry, Blue INNOship and Green Ship of the Future will host a seminar where specific maritime dilemmas will be discussed with a focus on collating input from all relevant stakeholders. The invitees will be technical managers from shipping companies, suppliers, technology providers, classification societies and authorities.

The dilemmas will be announced in advance, and a panel of experts will openly discuss how to solve the specific dilemmas. Participants will actively discuss the dilemmas and through the seminar increase their knowledge on the specific challenges. Participants will get to present and discuss the competences of their business in an expert forum, meet potential business and project partners including both technology providers and end users.

6 October 2015
Diesel House, Copenhagen

Registration to magnus@blainno.dk
Register early as the available space is limited

Uniting the Maritime Industry - Copenhagen Summit

During Danish Maritime Days 2015, Danish Maritime proudly gathers the maritime industry for a two day summit as a platform for collaboration and sharing of knowledge and experience about state-of-the-art maritime solutions and technologies.

The top-tier of the maritime industry will present their newest, most innovative technologies and solutions within green and safety technologies. The Danish maritime industry leads with its cutting-edge technologies and solutions, and we are very proud to present the elite of the international maritime industry with our latest news and advances says Managing Director Jenny N. Braat, Danish Maritime.

The conference is for technical executives, CTOs, sales executives, shipyards, marine equipment manufactures, ship owners and stakeholders interested in exploring the newest and most advanced technologies of the maritime industry.
